

E-Commerce Business Requirements Document (BRD)

Project: Power BI E-Commerce Business Analysis Dashboard

1. Project Overview

The objective of this project is to develop an interactive Power BI dashboard that provides business stakeholders with insights into sales performance, customer behavior, product performance, profitability, and regional trends. The dashboard will support data-driven decision-making and reduce manual reporting efforts.

2. Business Problem

The organization lacks a centralized reporting solution for monitoring sales, profit, customers, and product performance. Business users spend significant time generating manual reports and have limited visibility into key business metrics.

3. Business Objectives

- Increase revenue visibility
- Monitor profitability across categories and regions
- Identify top-performing products and customers
- Improve strategic decision-making through interactive reporting
- Automate reporting processes

4. Stakeholders

CEO, Sales Manager, Marketing Manager, Finance Team, Operations Team, Business Analysts

5. Functional Requirements

- BR-01: Display Total Sales KPI.
- BR-02: Display Total Profit KPI.
- BR-03: Display Total Orders KPI.
- BR-04: Show monthly sales trends.
- BR-05: Show regional sales performance.
- BR-06: Identify top-selling products.
- BR-07: Identify low-performing products.
- BR-08: Display customer segment analysis.
- BR-09: Enable filtering by Year, Month, Region, Category, and Product.
- BR-10: Display profit margin analysis.
- BR-11: Support drill-down and drill-through reporting.
- BR-12: Export dashboard insights for management reporting.

6. Non-Functional Requirements

- Dashboard refresh time under 30 seconds.
- Easy-to-use interface.
- Secure access to business data.
- Accurate KPI calculations.
- Responsive visualization layout.

7. Key Performance Indicators (KPIs)

- Total Sales
- Total Profit
- Profit Margin %
- Total Orders
- Average Order Value
- Top Products by Revenue
- Regional Performance
- Customer Contribution

8. User Stories

As a Sales Manager, I want to analyze monthly sales trends so that I can improve sales performance.

As a Marketing Manager, I want to identify valuable customers so that I can run targeted campaigns.

As a CEO, I want to monitor revenue and profitability so that I can make strategic decisions.

9. Expected Business Outcomes

- Faster reporting process
- Improved visibility into business performance
- Better inventory and sales planning
- Data-driven decision-making
- Increased operational efficiency
